XIVth International Symposium on Environment, Catalysis and Process Engineering

First Circular

ECGP'14

Mines Douai - France,
December 5th - 7th, 2017

Any pollution control action must take into consideration the proper environmental handling and related problems. In all cases, chemical processes play a highly significant role. In recent years there has been a shift from wastewater technologies and pollutant monitoring problems to environment management and solid wastes issues. Following the great success of the previous meeting (ECGP'1 Fez 95, ECGP'2 Fez 98, ECGP'3 Fez 2000, ECGP'4 Fez 2003, ECGP'5 Fez 2006, ECGP'6 Marseille 2007, ECGP'7 Rabat 2008, ECGP'8 Djerba 2009, ECGP'9 Settat 2010, ECGP'10 Fez 2012, ECGP'11 Lille 2013, ECGP'12 Las Palmas de Gran Canaria 2014, and ECGP' 13, Hammamet, 2015)

**Institut Mines Telecom Lille Douai,
IMT - Université de Lille**
and

Association Marocaine de catalyse et environnement
and

**The « Consortium Euro-méditerranéen des
Établissements d'Enseignement Supérieur et
Industriels » (C3ESI)**

Organize the XIVth International Symposium on "Environment, Catalysis and Process Engineering" on 5th -7th December 2017 at IMT Lille Douai, France. This symposium provides a forum for chemical scientists and engineers who are dedicated to the worthy mission of making a cleaner and healthier world for everyone
